

CHARFI DINA

Artificial Intelligence Engineering Student

Address: Ben aarous ,Tunis

Email: dina.charfi@esprit.tn

Linkedin: <https://www.linkedin.com/in/dina-charfi-0037b4380/>

GitHub link : <https://github.com/Dina0charfi>

SUMMARY

AI Engineering Student specializing in Machine Learning, Deep Learning, Computer Vision, and Generative AI. Built end to end AI applications integrating LLMs, emotion recognition, speech analysis, posture detection, and predictive systems across web, mobile, and desktop platforms. Experienced with Python, TensorFlow, PyTorch, Django, FlutterFlow, and full-stack AI product development.

EDUCATION

Mathematics Baccalaureate Diploma —

2023

Engineering Degree in Artificial Intelligence — ESPRIT

Ongoing

INTERNSHIPS & WORKSHOPS

STB Bank–Summer Internship(1st Year)

- Gained basic IT and banking experience.

BiGeek Website Project

- Developed websites using HTML, CSS, JS and designed UI in Figma

HYDATIS – AI & Software Development Internship

- Developed and integrated AI-driven software solutions, contributing to the design, implementation, and improvement of intelligent applications.

ESPRIT Workshop – Accessibility App

- Built a mobile app for people with hearing impairments.

EXPERIENCE

SDL Game Project

Role:Game Developer

- Developed classic games using SDL on Linux with C++ programming.
- Designed game graphics and interfaces using Adobe Design tools.

Smart Football

Role:Software Developer

- Developed a desktop application for football management using C++ and Qt.
- Integrated Oracle database for data storage and management.
- Connected Arduino sensors to capture motion for interactive features.

Web Agriculture Project

Role:WebDeveloper & Designer

- Built interactive website using HTML, CSS, JavaScript, PHP.
- Managed database integration for dynamic content and data management.

AI & ML Project for Associations in france

Role:AI &Software Developer

- Designed and deployed ML models integrated into Django applications for intelligent prediction and automation.
- Built SQL-based data warehousing and ETL pipelines for data processing.
- Created interactive Power BI dashboards for business analytics and decision support.
- Developed scalable backend solutions for AI-driven web applications.

Software Engineering Project – Animal Social Network

Role: Full-Stack Developer / Scrum Team

- Developed a social network platform for animals using Django and full-stack web technologies.
- Integrated Machine Learning and Deep Learning APIs for recommendations and content analysis.
- Built a MobileNet-based Deep Learning model to classify animal breeds (cats and dogs).
- Managed backend functionalities, database integration, and API connections.
- Applied Scrum and Agile methodologies for teamwork and project management.

Mobile Application Project – FlutterFlow

Role: Mobile App Developer

- Developed a mobile application using FlutterFlow.
- Designed UI screens and integrated backend services.
- Implemented authentication, navigation, and API connections.

Startup AI Project – Generative AI

Role: AI & Software Developer

- Developed Computer Vision and ML/DL models for intelligent predictive systems and AI-driven applications.
- Built AI modules for pitch evaluation, pitch deck generation, emotion/stress detection, posture analysis, and speech assessment.
- Integrated RAG systems and LLM APIs for generative AI and startup support solutions.
- Contributed to finance, legal, marketing, and business analysis modules developed within the platform.
- Developed end-to-end AI solutions integrated into desktop, web, and mobile applications.
- Collaborated on continuous improvement and enhancement of the platform's AI capabilities and user experience.

HYDATIS Internship – AI & Software Development Intern 2026

Role: AI & Software Developer

- Developed AI-driven solutions for software applications.
- Designed and integrated intelligent modules using Python and Machine Learning / Deep Learning techniques.
- Contributed to data processing, model integration, and backend development.
- Integrated AI components into web-based applications and APIs.
- Participated in the development, testing, and continuous improvement of the platform.
- Collaborated with the development team following Agile / Scrum practices.

SKILLS

- Programming Languages : C++, Python, PHP, HTML, CSS, JavaScript
- Frameworks / Libraries: Qt, Django, PyTorch, TensorFlow
- AI / Machine Learning: CNN, LLM, RAG, Computer Vision, Natural Language Processing
- Mobile Development: FlutterFlow
- Databases: Oracle, MySQL
- Tools / Others: Arduino, Git, Figma, API integration, Scrum / Agile ,IPv4 & OSI Networking, Multi-Modal Systems

SOFT SKILLS

- Teamwork & Collaboration
- Project Management
- Time Management
- Networking

LANGUAGES

Arabic
English
French

CERTIFICATION

Fundamentals of Deep Learning (NVIDIA)
NVIDIA Corporation – AI & Deep Learning / Multimodal AI Workshop
